

energy industry have brought about an incredible transformation of formerly polluted areas, restoring landscapes to their original natural beauty.

It is a success story all around, both environmentally and economically. Unfortunately, one-size-fits-all Washington regulations threaten to stop this success story in its tracks and to destroy the family-sustaining jobs the coal refuse-to-energy industry supports.

That is why, for the third time, I am reintroducing the Satisfying Energy Needs and Saving the Environment, or SENSE Act, in the 115th Congress as H.R. 1119.

My legislation ensures that regulations are tailored to allow a very specific and small subset of power plants to continue their remediation efforts and restore western Pennsylvania's natural beauty, as well as landscapes in historic mining communities across the country.

This legislation passed the House with bipartisan support last year, and I urge my colleagues to support it once again so that the vital and successful work of providing electricity while cleaning up the environment can continue.

#### AFFORDABLE CARE ACT SAVES LIVES

(Mr. LOWENTHAL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOWENTHAL. Mr. Speaker, from the mother of four with a preexisting condition to the family of a young boy who can now afford health insurance for the first time—we have heard constantly and over and over how the Affordable Care Act has saved lives. The Affordable Care Act provides quality, affordable insurance to millions of Americans.

For example, just in my district alone, nearly 100,000 people who are now covered through the Covered California exchange or through the Medicaid—which is in California Medicaid—expansion, they stand to lose coverage if the Affordable Care Act is repealed.

It is completely irresponsible to speak about repealing the Affordable Care Act with no replacement. I urge my colleagues to think about their own constituents before doing so.

#### THE THIRTY MILLION WORDS INITIATIVE

(Mr. GAETZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GAETZ. Mr. Speaker, I rise today to bring attention to a truly innovative pilot program in my district in Pensacola, Florida. This one-of-a-kind program, known as the Thirty Million Words Initiative, is a collaborative effort brought by researchers

from the University of Chicago in partnership with the Studer Community Institute.

The Thirty Million Words Initiative will educate parents of newborns at Sacred Heart Hospital, Baptist Hospital, and West Florida Hospital on best practices for speech and engagement during the critical learning stage up to 3 years old.

As we all know, interaction by speech or music with young children has not only had an impact on learning abilities but also emotional needs. This program builds on this principle and strives to include all newborns, regardless of income level, race, or ethnicity.

Through this simple commitment, we can challenge the socioeconomic stereotypes we have become too used to and build a future for leaders and innovators stemming from all walks of life and bringing new ideas for a vision for the future.

This truly unique partnership between our community leaders and the parents of our future generation will garner a secure foundation for our children to bring stronger education, allow limitless possibilities, and meeting the challenges to build a better tomorrow.

#### U.S.-ISRAELI RELATIONS

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, the relationship between the United States and Israel is a very important one, a moral one, and one beneficial to both sides.

I was very glad to see this week the President, so early on in his term, inviting and making welcome Prime Minister Benjamin Netanyahu to this country and showing that the U.S. relation with Israel is as important to us as it is to them.

Israel has a right to exist as a Jewish state, through much of its history of this Earth has been a very strong one for their assertion for their rights to be part of the fiber of the Middle East. The United States needs to be on their side and a firm partner in what they need to do.

So, again, kudos to President Trump for making this establishment of this relationship early on in his term and sending that assurance to Prime Minister Netanyahu, the people of Israel, and the importance to the people of this country of that relationship.

#### LIFE, LIBERTY, AND THE PURSUIT OF HAPPINESS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2017, the gentleman from Iowa (Mr. KING) is recognized for 60 minutes as the designee of the majority leader.

Mr. KING of Iowa. Mr. Speaker, it is my privilege to be recognized to address you here on the floor of the United States House of Representatives, this great deliberative body.

To start this off, I yield to the gentleman from Nebraska (Mr. FORTENBERRY).

Mr. FORTENBERRY. Mr. Speaker, I thank the gentleman from Iowa. Perhaps this will embarrass you, my colleague, STEVE KING, but as I was flying into Nebraska last week—and I do this on occasion—I am looking out of the window and looking at the rolling hills of the western edge of Iowa as it borders the Missouri River and all of that beautiful terracing that has been done, all of that extraordinarily productive farmland, in order to save the soil and increase yields, and I wonder how much of that STEVE KING did himself in a former life. So I am grateful not only for the opportunity but mostly for your friendship.

Mr. KING of Iowa. The answer would be a fair amount, and I yield to the gentleman.

Mr. FORTENBERRY. Mr. Speaker, as I was going through my mail last week, I read a publication that I receive frequently at my house from what is known as the Great Plains Trail Network. This is a dedicated group of people who enjoy, promote, and foster the growing network of hiking and biking trails in my hometown of Lincoln and the vicinity. They provide an extraordinary service to our community. Most notably, the trail systems provide an alternative means of transportation, physically linking our community in creative ways along creek beds and underpasses, through open plains and wooded areas, and beside the wooden fences between residential neighborhoods. These trails also link us in a more profound way. They link us to the values of healthy exercise, neighborliness, and the beauty of nature—even in the setting of the urban city environment.

Now, Mr. Speaker, I received an unusual media request recently. New York Magazine wished to speak to me. I took the meeting because I wanted to give a broader perspective on the issue of environmental stewardship, particularly in light of policy debates about energy and the environment. Since this topic can be so toxic, I thought it was important to reframe the issues with some prairie perspective, if you will. Perhaps, Mr. Speaker, it is time to spike the football and focus on solutions and activities that all of us can agree on and that all of us see are beneficial.

Mr. Speaker, for the 21st century, we must harmonize environmental and economic security. As a different public policy approach, I am considering a new idea called the zero-emissions energy credit, or ZEEC.

□ 1600

The more that we can do, I believe, to stop waste and pollution through conservation and innovation gives us peace of mind in regards to the proper use of our resources.

This ZEEC concept would reward reduced emissions through a tax credit
